- › Assist in developing site-specific procedures for scheduling and implementing the construction monitoring system
- › Generate periodic schedule reports, identify delays and critical paths, and recommend recovery scenarios and acceleration schedules
- › Support the site lead in daily/weekly coordination meetings, interactive planning, and accurate forecast assessments
- › Prepare all site-related schedule reports, including support for the monthly project schedule review

Your qualification:

- › Bachelor's degree in Business Administration, Engineering, Supply Chain Management, or related field
- › Good knowledge of manufacturing processes and power plant principles is an advantage
- › Proficient in scheduling software and tools such as Microsoft Project, Primavera, or SAP
- › Excellent communication and interpersonal skills
- › Strong organizational skills
- › Fluency in English, German is a plus

We offer:

- › Permanent employment contract
- › Competitive compensation
- › Flexible working hours and remote work options
- › Opportunity for career development and training
- › Great working atmosphere and a highly motivated team
- › Continuous support from a dedicated contact person
