IMS Mainframe Specialist (m/f/d)

Benefit from our expertise and a strong network of attractive companies in your job search. We will find your new dream job.

To support a well-known customer, we are looking for you, a **Mainframe IMS Specialist** (m/f/d) in full-time or part-time at the **Essen** location.

Your tasks:

- › Responsibility for the IMS software lifecycle management: installation, upgrade and maintenance of the software
- › Exploration of new product features for continuous optimization
- › Third-level support for software errors
- › Contact person for customers when using the software products
- › Implementation of change and problem handling
- › Configuration and customization of software products
- › Setting up parameters and carrying out reorganizations, health checks, etc.
- › Communication with customers and providers

Your qualification:

- › Experience as an IMS system programmer or experience in a similar position
- › Experience in 3rd level support
- › IMS Level 3 system program skills
- › Proficiency in installation, maintenance, problem diagnosis and administration of IMS DB
- › Experience communicating with customers and vendors
- › Strong analytical skills
- › Strong service orientation and problem solving skills

Your benefits:

- › Employment in a permanent employment relationship
- › Attractive remuneration
- › Company pension scheme as well as vacation and Christmas bonuses
- › Job-related further training opportunities
- › Travel allowance and additional meal expenses
- › Long-term jobs close to home
- › Personal and individual support

Your way to your new dream job:
